

# IOWA Form A - Test Scores

The following tables identify the Core Total Scores and Composite Total Scores that may be obtained with each test level of the IOWA Complete Battery. You will need this information for test administration and to ensure all test scores needed for your student will be provided on the score report.

Under each heading is the list of tests that you **must** have your student complete in order to obtain the Core Total Score or the Composite Total Score. **Math Computation in Levels 7-17/18 does not need to be taken in order to receive a Core Total Score or a Composite Total Score.**

When your student takes Levels 5-9 of the IOWA, you will receive a Primary Reading Profile Report in addition to the Performance Profile Report. The tests located under the Reading Profile Report category must be completed by your student in order to receive this additional report.
